

Scantech-ID SG-15^{Colour} Update "WHAT'S NEW"

Dear Scantech-ID SG-15 User,

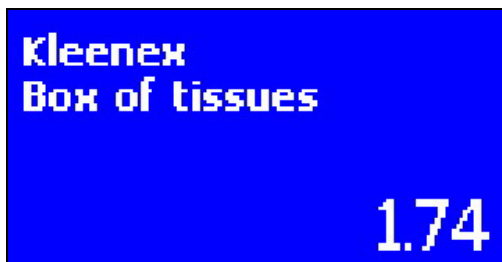

- In order to support the continuity of this successful Scantech-ID product and
- to keep the product features up-to-date, we have carried out a major overhaul on the SG-15^{Plus} and made its life more colourful.

Here is an overview of **our objectives** and the **new major product characteristics**:

1. Color TFT-LCD 3.5" display 320X240 resolution 16 million colours for high quality displaying Wide viewing angle. A big step forward in readability. Comparison:

SG-15 and SG-15^{Plus} (original sizes ¹⁾)

SG-15^{Colour} (original sizes ¹⁾)

Kleenex Tissues

Box of 90 pcs Kleenex Balsam tissues

Thai: **คลีเน็กซ์**

Chinese: **薄紙**

Russian: **Салфетки**

€ 1.74

2. Embedded Linux OS for better and long term feature support.
 3. Running on ARM Dual-Core processor
 4. Compatible with existing SG15^{Plus} regarding communication protocol, Ethernet, WiFi, and POE
 5. Remote unit configuration using modern web browser
 6. Application packages and system parts remotely upgradable
 7. The barcode scanner is configured through webbrowser instead of bar codes
 8. Creating custom lay-out of the Price-Check display
 9. Up-to-date WiFi technology supporting IEEE 802.11 a/b/g/n/ac Dual-band 2.4GHz/5GHz
 10. Handscanner connection now using USB instead of RS-232
 11. Real-time clock on board for automatic standby/wake-up, saving energy and product lifetime
 12. 2D scan engine available later this year.
- SG-15 housing, PSU and Ethernet network connection fully compatible with the previous models.
 - All these actions were taken to enable you to continue and expand your enduring success in the market with the Scantech-ID Shuttle.
