Integration, Connectivity & Configuration

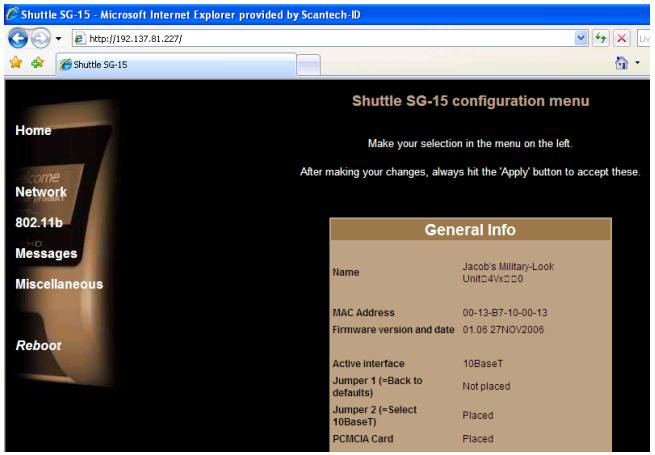

- The SG-15 Shuttle comes standard with an easy-to-use Configuration Tool.

  Or: Use your web browser!

- A customized application program -by the system integrator- is necessary to couple the SG-15 to the store data-base

- Compatible with any standard WiFi IEEE 802.11b network

Software Development Strategies

Which roads to take?

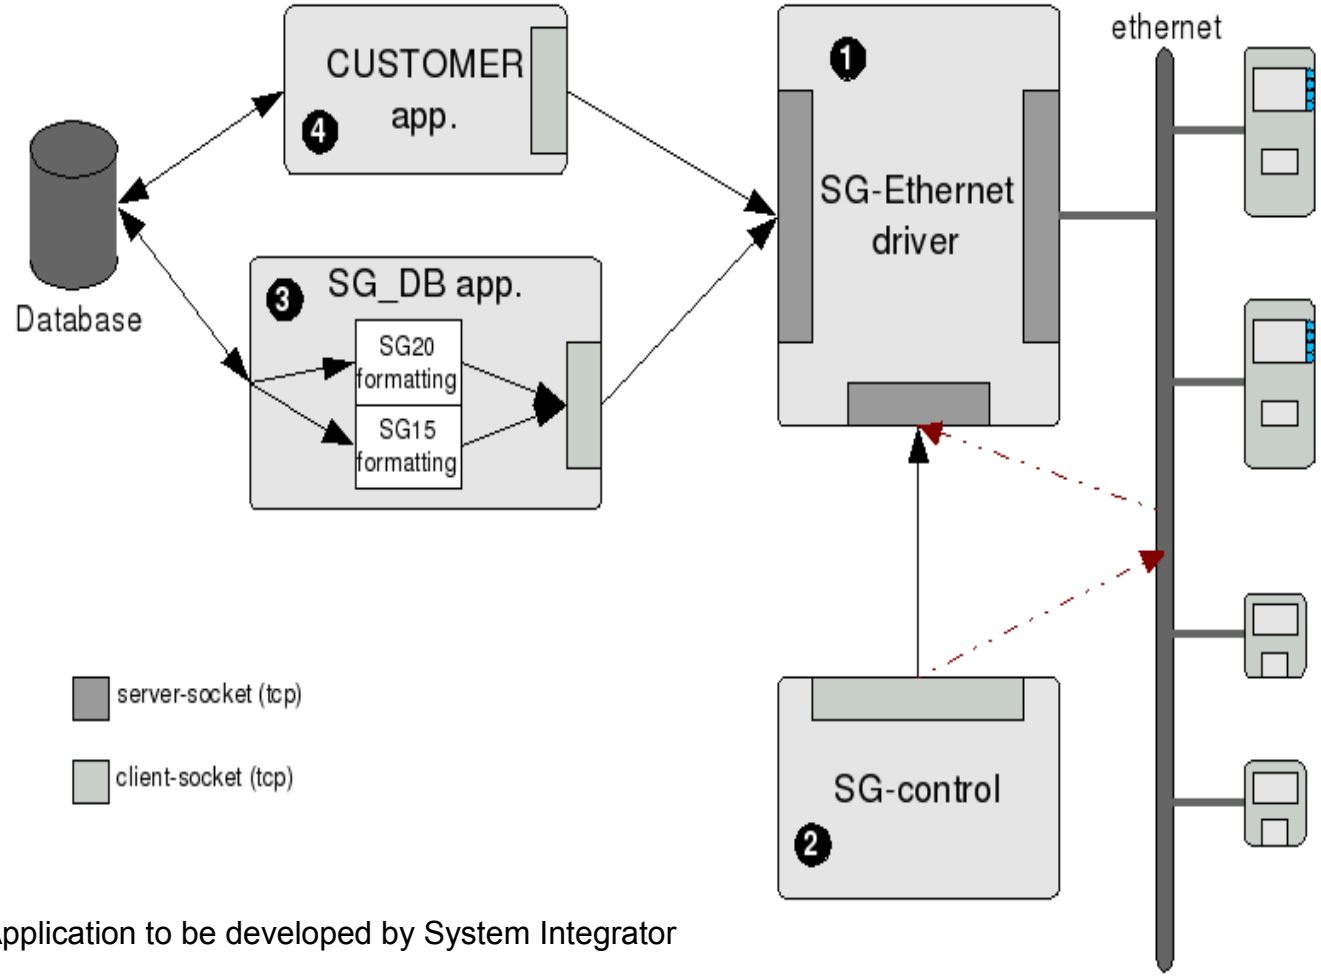

1. Do it yourselves — It's a simple IP device!
2. Basic communication examples. — See Product Support CD
3. Framework of software tools to Get It Alive — See next sheet

- Free Source Code! (after installation of SG_net toolset)
- The easiest scenario: Export your DB in format of SG_DB.txt and you're ready!

Scantech Supplies Framework of Software Tools

- 1. Ethernet Driver
- 2. Demo application
- = Free Source Code
- 3. Windows & Linux
- 4. For SG-15 & SG-20

❹ Application to be developed by System Integrator

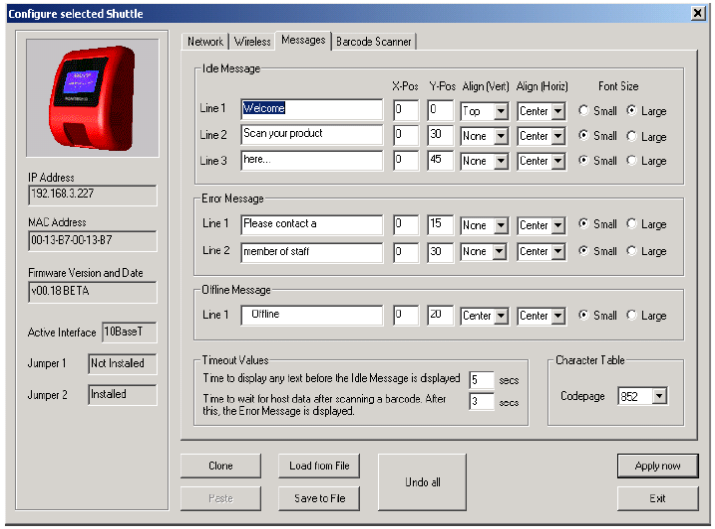

❸ Demo application (incl sources) supplied by Scantech on CD

Supportive Tools by Scantech

- Extensive User's manual: The Reference bookwork

- Product Support CD-rom, including:
  - All Tools & Documentation
  - Software Source Code Examples
  - Ethernet driver & Free Source Code

How to Demo & Test the SG-15

1. Quick and Simple
   Shows 5 fixed demo texts:
   (set in Server mode!)

   or

2. More advanced, 'Live'
   and Customer focused:
   Using SGNet Software Tools
   with simple .txt database
